Subject: Fair Consideration of the Microsoft Offer

Ladies and Gentlemen,

Having operated computers since the 1980s, and having experienced the benefits first hand, I urge you to give serious consideration to the self serving remedy proposed by MS, i.e. the wholesale distribution of MS hardware and software to our nation's youth.

The national trade association for which I work is a prime example of advantages of an ****open shop**** approach to computer and office automation solutions.

We operate BOTH MS and Macintosh platforms side-by-side without difficulty. This empowers our creative team to use the platform best suited to the task, most usually Macintosh.

I strongly recommend an even handed and equitable remedy which serves as a REAL penalty to the MS way of doing business while offering the benefits of computer learning to our youth. The Macintosh is the computer of choice for the future.
